

1951 Ford Victoria

This great looking 1951 Ford Victoria is a wonderful example of Ford's very first hard top car. It is a mild custom featuring slick gloss black paint and wonderful chrome. The hood stainless and ornament have been removed to give it a cleaner look. It has lake pipes and retro hubcaps to complete the body's classic sled look. The top has not been chopped.

The original flathead motor has been replaced with a higher performance flathead that has Offenhauser Heads, a Offenhauser intake with 2 Ford carburetors, Smitty pipes and various other polished items. It runs very smooth. The original 3 speed manual transmission was rebuilt and she shifts very smooth. The car has its original 6 volt system and it works properly.

The interior was restored to its original look with new seat covers, carpeting and headliner. Even the package tray was restored to its original appearance. This sexy looking classic is a sure show winner and a real headturner!
